Contact: Susan Bixler
Education & Outreach Assistant
419-699-0356

Dr. Kristin Stanford
Education & Outreach Coordinator
419-285-1800

Teachers can explore and experience Stone Laboratory's Lake Erie Science Field Trip Program. Get a feel for the fun, hands-on activities your students will experience when you bring them on a trip to Stone Lab. This trip is aimed at teachers of students fifth grade and older.

- Two-hour science cruise with instructor aboard a Lake Erie Research Vessel collecting biological and environmental data.
- Gibraltar/Stone Lab Tour including a visit to Cooke Castle, an overview of Stone Lab programming and a short herpetology lesson that includes the protected Lake Erie Watersnake.
- Aquatic Visitors Center tour, giving our participants an opportunity to examine the Lake Erie ecosystem.
- Conference lunch on Gibraltar Island.

Meet at the Miller Ferry Dock, 5174 East Water Street, Port Clinton, OH 43452, in time to take the 8:30 a.m. ferry to South Bass Island. Transportation to and from the South Bass Island Miller Ferry Dock will be provided by Stone Lab.

PLEASE NOTE:

- If you miss the 8:30 a.m. Miller Ferry you will not be able to make the science cruise.
- Clothing: Please dress according to the weather forecast for the day including sweatshirts and rain gear if necessary.
- No sandals please. Substantial shoes only!
- In case of severe inclement weather, classroom activities will be substituted in place of the cruise.
- If you choose to stay at Put-In-Bay after the workshop is completed, transportation to the Miller Ferry Docks is your responsibility.
